Lindau

Finished the visit to the castles of the mad king we go to Lindau where we will stay the night. Here the tour to the **lake of Constance** starts, a lake that 'belongs' to three countries: **Germany**, **Switzerland** and **Austria**.

[Photo]
The port

The city has a magnificent **port** in the lake with two **lighthouses**, the former one and the new one. The first one has a square base, not usual for this kind of buildings, and the second one is high enough.

Particular architecture

3rd day: Meersburg

We have slept in the "**Montfort Schloss**", name that coincides with a surname that we know very much here. We have done a small mess to ourselves with the entry system. [Photo]
All we had to do was by phone and consists of giving you a code with which you open a mailbox where you find the key. We stayed at the garret, very well equipped.

On having finished the breakfast, where we have known a waitress who had been employed at Tarragona, we have visited **Meersburg's** city. At the end of the visit the rain has visited us. The city has received us with its corresponding **port** and a very curious **statue**, "**Imperia**", of the German sculptor **Peter Lenk** representing a courtier of **Balzac's** story.

"Imperia"

The city has a **castle** that it's worth visiting, the **Burgsmuseum**, and the new **palace** of baroque style.

The near day, a little more ... ;)
