

The circular route of the three mountain passes: **Grimsel, Furka and Susten**. A journey full of beautiful views, glaciers that freeze the heart and valleys that leave you speechless. At over 2000 meters the air is clean, crisp colors, vibrant. A feast for the senses. We followed the order above and that we recommend.

Grimsel

We started the route in **Interlaken** and head south through **Meiringen** and **Innertkirchen**. We took the right road that leads for several kilometers to the Grimsel pass until the port at 2165 m altitude. Here the adventure begins.

The Grimsel pass

Furka

Now we head east. The views are stunning. The Rhone glacier is very near.

After the first port

The Rhone glacier

The ice is really blue
